Real Maths fun and progress

Maths Factor is strongly recommended by a parent member as a fun and effective way in which to motivate a pupil with Down's syndrome to enjoy maths, make real progress from Reception to the present level and want to do a little every day. The Maths Factor was created in 2010 by Carol Vorderman to encourage enjoyment of maths by ensuring progress, fun and achievement. Check out the Tower of Achievements on their website.

Until 9th February 2017, dsOK members have been offered a unique code - [click here](#) - to access a month's trial for £1.
